CABLE IDENTIFIER FUNCTIONALITY | Line Device + IC2G Rx

Line Device

Complement your **ILF - Feeder and Phase Identifier** device with the **cable identifier functionality**.

Just by adding the **IC2G Rx** device to the Line Device you get a **CI - Cable Identifier** device. A quick and simple way to have two devices in one.

A solution to improve the electrical safety in the LV energized cable manipulation procedures.

Applicable to models: ILF6 - ILF12 – ILF G2 – ILF G2 Pro

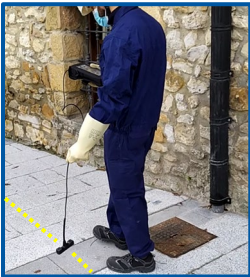

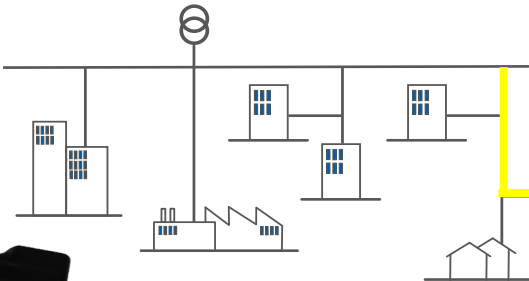

IC2G Rx

ROUTE CABLE WITH THE SENSOR T

Identification of the LV energized cable route upstream, where the Line Device (transmitter) is connected.

IC2G Rx - Receiver

Line Device - Transmitter
